

PUBLIC NOTICE FOR January 2020 to December 2022

Monitoring and Reporting Violation of the Safe Drinking Water Act

Patuxent Naval Air Station (Navfac-Wash)

June 1, 2023

date of notice

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not your drinking water meets health standards. During **January 1, 2020 to December 31, 2022**, we did not complete testing for **Fluoride** and therefore cannot be sure of the quality of our drinking water during that time.

fluoride:

A - Reason(s) for failure to collect, test, and report January 2020 to December 2022 results for

B - Reason(s) for failure to report January 2020 to December 2022 test results for fluoride:

Well 3C was out of service at the end of the monitoring period and unable to collect a water quality sample

for fluoride. When the well returns to operation, the required sample will be collected and analyzed.

Additional testing will be conducted during 2023. For additional information contact

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

**Monitoring and Reporting Requirements NOT met for the
Triennial, January 1, 2020- December 31,2022 period
At Patuxent Naval Air Station (Navfac-Wash)**

June 1, 2023

date of notice

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not your drinking water meets health standards. During the Triennial, January 1, 2020- December 31,2022 period, we did not complete testing for PHASE II/V METALS, and therefore cannot be sure of the quality of our drinking water during that time; a total of one (1) drinking water sample was to have been collected and tested for Phase II/V Metals.

<input checked="" type="checkbox"/>	A	Reason(s) for failure to collect, test, and report the Triennial January 1, 2020- December 31,2022 period results for Phase II/V Metals
<input type="checkbox"/>	B	Reason(s) for failure to report the Triennial January 1, 2020- December 31,2022 period results for Phase II/V Metals

What should I do?

There is nothing you need to do at this time.

What is being done?

Well 3C was out of service at the end of the monitoring period and unable to collect a water quality sample for phase II/V metals. When the well returns to operation, the required sample will be collected and analyzed.

Additional testing will be/ has been completed on
