NAS PATUXENT RIVER INSTRUCTION 3140.5P

From: Commanding Officer, Naval Air Station Patuxent River

Subj: SNOW REMOVAL

Ref: (a) Public Works Snow Removal Plan

Encl: (1) Station Road and Parking Lot Priorities List
(2) Environmental Coordinators

1. Purpose. To establish standard operating procedures for the removal of snow and ice from the airfield (including aprons), roads and parking lots.
2. Cancellation. NASPAXRIVINST 3140.5N
3. Background. The expeditious removal of snow and ice from aircraft operating areas, roads, and parking lots enable the Naval Air Station (NAS) Patuxent River, Solomons Navy Recreation Center, Webster Outlying Field, and other locations coming under the Installation Commanding Officer's area of responsibility to continue performing their missions despite adverse weather conditions.
4. Action.
 - a. The Public Works Officer (PWO) is responsible for the conduct of all snow removal operations on runways, taxiways, roads, and parking lots. These responsibilities include ensuring the following items are completed by 1 November each year:
 - (1) All snow removal equipment owned by Small Business Base Operating Service (SBOS) Contractor is properly maintained and outfitted.
 - (2) All required contracts covering snow removal are in place.
 - (3) An adequate stockpile of deicing material is on hand by the SBOS Contractor for contracted snow removal. This stockpile is not government use.
 - (4) A Public Works Snow Removal Plan is in place. This plan shall include the following:
 - (a) Recall information for SBOS contractor involved in snow removal operations.

(b) Recall information for designated Public Works SBOS Facility Contracts Management and Facility Sustainment (FMFS) Team.

(c) An updated list of airfield priorities (provided by Air Operations).

(d) Communication plan for the Production Officer and snow removal personnel to establish timelines and milestones during snow removal operations and to provide updates to the PWO.

b. The Air Operations (AIR OPS) Officer shall annually establish/update a list of airfield priorities (based on various active runways) and provide it to Public Works for inclusion in their Snow Removal Plan. Standard operating procedures for mission critical aviation assets is to fly out before a snow storm hits. AirOps Officer is to notify Public Works Duty Officer (PWDO) immediately if snow removal effort is required to clear a runway for any mission critical aviation assets to relocate to safe haven. Public Works will expedite snow removal effort; however, this will increase the cost of the service contract.

c. The SBOS Contractor shall ensure that an adequate supply of deicing material is in stock and the deicing material is the correct type, size, mix ratio, and is spread uniformly at the specified rate over the entire width of the streets, roads, sidewalks, and parking lots.

d. Activity Facility Coordinators shall ensure that an adequate supply of removal tools (e.g. shovels, chippers, etc.) and de-icing materials (e.g. salt) are on hand at the activities to remove snow or ice from building entryways including fire escapes. Each activity is responsible for removing snow and ice from walkways, entryways, etc. All tools (e.g. scrapers, lock de-icer, etc.) necessary to remove snow and ice from Government vehicles are on hand.

5. Procedures. Snow removal operations are required 24 hours per day, seven days a week, except for airfield snow removal operations, which can only be conducted during daylight hours.

a. Airfields

(1) Air Operations will designate the priorities for all airfield surfaces for each snow/ice related occurrence. Requests for priority snow removal for the airfield shall be phoned into the Airfield Facilities Division (301) 342-3570. The Airfield Facilities Division will forward this information to PWO for appropriate action. The Contractor shall receive clearance from the airfield operations center prior to commencing snow and ice removal operations.

(2) Contractor shall provide snow and ice removal services for the runways, taxiways, aprons, and paved areas in the airfield. The Contractor shall provide deicing services to ensure minimal ice accumulation. The Contractor shall initiate work upon completion of Priority One areas and in conjunction with Priority Two removal operations. Airfield snow removal operations can only occur during daylight hours.

b. Roads and Parking Areas

(1) Station roads and parking lots will be cleared in accordance with the Station Road and Parking Lot Priorities List in enclosure (1). Mission essential functions of NAS Patuxent River are in continuous operation and must not be degraded during storm events. Fire protection access cannot be inhibited as a result of storm conditions.

(a) Priority One: The contractor shall initiate work upon accumulation of one inch of snow on streets, roads, sidewalks, and parking lots or initial accumulation of ice or frozen precipitation. The contractor shall continue operations during the entire period of precipitation.

(b) Priority Two: The contractor shall initiate work upon completion of Priority One or earlier as conditions allow, and continue operations until all streets, roads, and parking lots are cleared.

(2) Snow removal operations shall not obstruct driveways, entrances, handicapped parking and accessways, pedestrian walkways, and similar places. The Contractor shall provide and spread all salt, sand, or other deicing materials when needed, on paved surfaces for safety of vehicular and pedestrian traffic.

c. Sidewalk Clearing

(1) There are very limited high traffic sidewalks that are on contract and the contractor's responsibility.

(2) Facility Coordinators are responsible for snow and ice removal from building sidewalks, entryways, and handicap ramp/access.

(3) Snow and ice removal can be purchased through DoD Email to remove snow and ice from sidewalks and building entrances, however, available quantities are limited.

(4) Salt can be ordered through Hazmart since it is considered a hazardous material and requires purchase authorization. Facility managers will need to contact their respective Environmental Coordinator, see enclosure (2), so the order can be placed.

6. Records Management. Records created as a result of this instruction, regardless of media and format, must be managed per Secretary of the Navy Manual 5210.1 of January 2012.

7. Review and Effective Date. Per OPNAVINST 5215.17A, the Public Works Officer will review this instruction annually on the anniversary of its effective date to ensure applicability, currency, and consistency with Federal, DoD, SECNAV, and Navy policy and statutory authority using OPNAV 5215/40 Review of Instruction. This instruction will automatically expire five years after effective date unless reissued or canceled prior to the five year anniversary date or an extension has been granted.

S. B. STARKEY

Releasability and distribution:

This instruction is cleared for public release and is available electronically only via
