

Environmental Policy Naval Support Activity Washington August 2022

Naval Support Activity Washington (NSAW) is charged with efficiently delivering common operating support services to all missions and commands located within its activity area. NSAW is dedicated to providing the highest level of mission support and quality of life services for all operating forces and ashore support activities. Our goal is to actively promote mission readiness while demonstrating environmental leadership through stewardship. We accomplish this goal within the framework of an Environmental Management System (EMS) that preserves our environmental, natural, and cultural resources.

I strongly encourage each NSAW employee, whether military, civilian or private contractor, regardless of rank or grade, to perform their duties in a manner with the objective to comply with environmental regulations, always seek opportunities to improve, reduce waste to conserve resources and eliminate pollution at every opportunity. This simple approach in our daily activities is summarized and promoted with the acronym C.A.R.E. and serves as the main focus of the NSAW EMS program.

Comply with Regulations

Always Improve

Reduce Waste

Eliminate Pollution

Consistently incorporating the C.A.R.E approach in our daily activities demonstrates NSAW's commitment to mission and environmental readiness. We all have the responsibility to preserve and protect the environmental resources entrusted to us. Your support in fulfilling the objectives of the NSAW Environmental Policy is key.
